Riedel High Performance Champagne Glass - a Masterpiece of Craftsmanship

They set the perfect stage for the perfect champagne experience.

High Performance describes the collection in two ways – its functionality and its design.

The visually appealing chalices have delivered a perfect *"performance"* at numerous international glass tastings and prevailed as the best glass.

The machine-produced visual effect has a positive impact on the taste experience: not only does it give the chalice an attractive appearance, it also increases the internal surface area. This allows the champagne to open up and bring out its full aroma, with all its subtle nuances.

The long drawn stems are a masterpiece of the glassmaker's art. They give the glass an exclusive, unique elegance.

The stems come in black, red, clear, pink, royal blue and yellow and are set in elaborate detail by hand in the glassworks in Kufstein, Austria.

The glasses are made of crystal glass and are dishwasher safe.
