

**New MOSEL DECANTER!
Machine-made with Visual Appeal from 2022!**

Ideal for older red wines, young white wines, champagne, and orange wine

The design is clearly in line with the trend of “casual dining”, explains Maximilian J. Riedel, designer of the decanter. He sees this as a clear trend of our time and explains,

“Back to basics. Riedel decanters with double and triple decanting functions are extremely practical, perfect for connoisseurs. For some, however, these decanters are too complex and too laborious to handle. With our decanters from the handmade M collection, we are taking a step back and offering an alternative that, we think, perfectly reflects today's ‘farm-to-table’ zeitgeist. From 20220 therefore, MOSEL will be offered as a machine-made variant in addition to the handmade model.”

The decanter is handy, fits perfectly in the fridge door and is dishwasher safe.

Its tall slender shape, visually blown, makes the decanter easy to handle. It's ideal for older red wines, young white wines, champagne, and orange wine

The machine-made MOSEL decanter is available in a box of six for the gastronomy trade.
