

Fatto a Mano Performance RED

Traditional Venetian craftsmanship meets the impeccable machine-blowing technology of the 21st century.

In 2019 Riedel presented *Fatto a Mano Performance*, a combination of two successful series that marries refined craftsmanship (for the stem and the base) and the precision of a machine (for the bowl).

In 2020 the series will also be available with a red stem. In Asia, in particular, red is regarded as the colour of life. It also symbolises joy, warmth, fame and strength.

Riedel *Fatto a Mano Performance* is produced in the factory in Kufstein. The glasses in this series are made of crystal glass and are dishwasher safe. The variations are: red stem and transparent base, or transparent stem and red base.

Available as Cabernet, Pinot Noir, Riesling and Champagne glasses. Each glass is individually packed in a gift box.

Fatto a Mano was the first grape varietal specific glass collection with coloured, handcrafted stems – a milestone in the company's history. *Performance*, the first machine-made glass collection with the "optic impact", wowed the international wine world with its particular functionality within only one year of its commercial launch.

For more information about the entire range of Riedel glasses and decanters, go to www.riedel.com.
